## **IMPACT PULVERIZERS**

The TECHNO WINGS Impact Pulverizer meets most capacity requirements. It lend themselves to a wide degree of adjustment with finesse of the finished products ranging from about 60 mesh to bulk passing through 300 B.S.S. mesh depending to a considerable extent on the particular materials being handled.

The Techno Wings Impact Pulverizer / Pulveriser is a versatile grinding unit of heavy and rugged construction and built for continuous operation day after day. The impact pulverizers are especially designed for the medium fine, and fine size reduction.

The impact Pulverizers meet most capacity requirements and lend themselves to a wide degree of adjustments with fineness of the finished product ranging from about 60 mesh to bulk passing through 300 mesh, depending on a considerable extent to the particular material being handled. Unlike an ordinary hammer mill, it has no screens to break, wear out or clog in the crushing chamber. The Techno Wings Impact Pulverizers are combines grinding, classifying and conveying all in one single unit.

## Operating Principle of Impact Pulverizer

The impact pulverizer consists of an encased rotor carrying swing hammers, whizzier classifier for fineness regulation and pressure gradient creator mounted on a solid shaft. Raw material to be pulverized enters the crushing chamber through the hopper or the automatic rotary feeder. The impact of the hammers on the feed material against the liner plates reduces it into fine powder. The ground material is carried towards the whizzier classifier for classification and the oversize particles are rejected by the classifier and returned to the crushing chamber for further grinding. The classified material is then conveyed into the Cyclone for collection and bagging. A dust collector is provided in the system for ensuring dustless operation and for no loss of ground powder.

## Typical Application of Impact Pulverizer

The Techno Wings Impact Pulverizers are used for a wide range of application e.g. Agricultural, Chemicals, Carbon & Graphite, Coal, Coke, Coconut Shell & Wood Saw Dust, Clay, Dye Stuff & Pigments, Detergents, Ferro Alloys Fertilizers, Fillers, Food Products, Herbs & Spices, Insecticides and Pesticides, Katha, Marine feeds, Minerals, Plastics, Pharmaceuticals, Resins, et cetera

#### Outstanding Features of Impact Pulverizer

- High speed rotor assembly two-way reversible hammers / Beater
- Easy access to impact pulverizers interior through dual access doors
- Available in different size & models
- Cold & silent running
- Dust free operations
- Robust Construction
- Low Specific Power Consumption
- Durable Long Life
- Guaranteed grinding efficiency, particle sizes are finer and more uniform than that obtained from machine using screen

## Construction of Impact Pulverizer

Type: Air Swept Impact Mill with Whizzier Classifier operation in closed circuit

Body: Solid iron, machined and aligned on a strong iron base with top covers bolted.

Feeder: Automatic Rotary Feeder, gear driven from the main shaft with feed control mechanism

Crushing Chamber: Lined with renewable solid iron (

Stainless steel optional) breaker plates

Rotor: Machined mild steel thick plates mounted on main shaft

Shaft: Solid Alloy Steel

Classifier: Mild Steel whizzier Classifier with adjustable spider to control fineness of ground powder up to 300 mesh depending on the type of material being pulverized

Bearings: self-aligning ball bearings in cast iron housing with suitable grease cups for lubrication

Hammers: Forged alloy steel, hard faced, with manganese steel electrodes and balanced.

Blower: Paddle type with replaceable blades

Cyclone: Mild Steel sheet fabricated

Dust Collector: Top and Bottom halves of Mild Steel Sheet, to be interconnected by dust bags Piping: All interconnecting Mild Steel piping supplied with loose flanges to facilitate easy erection Standard Accessories of Impact pulverizer:-

- Motor Pulley
- 2 Number cotton balloons.
- Anti vibrating foundation stand with adjustable rail for motor

### Extra Accessories of Impact pulverizer:

- Suitable totally enclosed fan cooled three phase squirrel cage motor as per is: 325. {Electricity (special power can be accommodated): 110/220/380/415 volts, 50/60 Hz, 1/3 phase}
- Starters, main switch, ampere meter, capacitor for three phases
- Foundation bolts
- V Belts
- All Contacting Parts Stainless Steel 304 / 316 can be accommodated
